Re: Douglassville Disposal Site
Unilateral Administrative Order

Dear Mr. Klinikowski:

As you are aware, the effective date of the Unilateral Administrative Order (UAO) for the Phase II (onsite incineration) remedial action for the Douglassville Disposal Site was extended several times over the past year. That UAO went into effect on June 17, 1994. The various Respondents named in the UAO were required to inform EPA, within seven days following that effective date, whether they would comply with the Order. We have received notifications from the majority of the Respondents. All of the notifications received advise EPA that the Respondents intend to **not comply** with the Order. As such, EPA is considering the limited options we have in this matter. It is very likely that EPA will proceed with the remedial action using Superfund monies.

I will continue to keep you advised regarding this matter.

Sincerely,

Victor J. Janosik
